

Attention: Due to changes in Colorado Rules and Regulations not all testing companies can test or work on fire system assemblies. If you have a fire system you will need to make sure your tester of choice can work on fire systems.

The following is a list of certified testers that are doing tests in the area. Each company is identified with what type of backflow assembly that they can test. You may use any of these testers or any other that is recognized by the State of Colorado.

Backflow Tech Inc.
